

DETAILED ESTIMATE SUNDRAPE ROLLER

Roller blinds for skylights, type 8500/8800
mounting on wing of window
Draperies quality: see our sundrape® roller blind collection
width of drapery: maximum 1600 mm
height of drapery: see our sundrape® roller blind collection

Roller blind shaft
diameter 25 x 0,4 mm, steel, enamelled, with integrated steel spring

Steel spring
for a precise adjustment of the spring tension, ensuring an even tension of the drapery between roller blind shaft and the bottom tube when blind is closed.

Bottom tube
diameter 10 x 0,1 mm, extruded aluminium AlMgSi 0,5 F 22, technically anodized as per E6/EV1.

Hold-down claws
for the desired position of the drapery,
either half or completely closed.

Operation
open or close the roller blind drapery by means of handle bar, mounted at bottom tube.

Versions
Type 8600: for standard skylight windows type Velux GGU, GGL, Roto special mounting accessories for mounting into wing of window is provided.
