Your **sundrape[®]** dealer:

ROLLER BLIND SYSTEM

Variability is what's it all about

Various features guarantee first-class functionality. Roller blinds without head box for example can be equipped with an additional support profile for a quicker and safer mounting. A unique novelty of the sundrapé® **Quadro**™ roller blind line is the 'Soft' roller blind, available with or without head box.

The type "shaft below" (WU) means another possibility to exploit daylight to an utmost extent while protecting computer workplaces from dazzling day light. The special shapes like triangle or trapezoid make sundrapé® **Quadro**™ the unbeatable alternative for special requirements.

soft roller blind, freely suspended

roller blind without head box, freely suspended with side pull drive or electric drive

roller blind without head box, with side pull drive or electric drive and tension wire guiding

soft roller blind with head box, freely suspended

roller blind with head box, freely suspended, with side pull drive or electric drive

roller blind with head box, with SunTape side guiding, side pull drive or electric drive

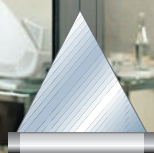

roller blind with head box, with U-shaped side guiding, side pull drive or electric drive

roller blind with head box, with tension wire guiding, side pull drive or electric drive

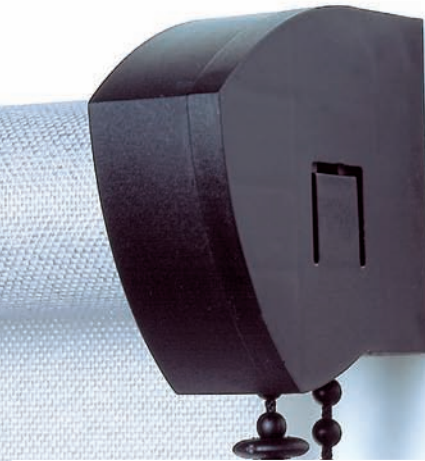

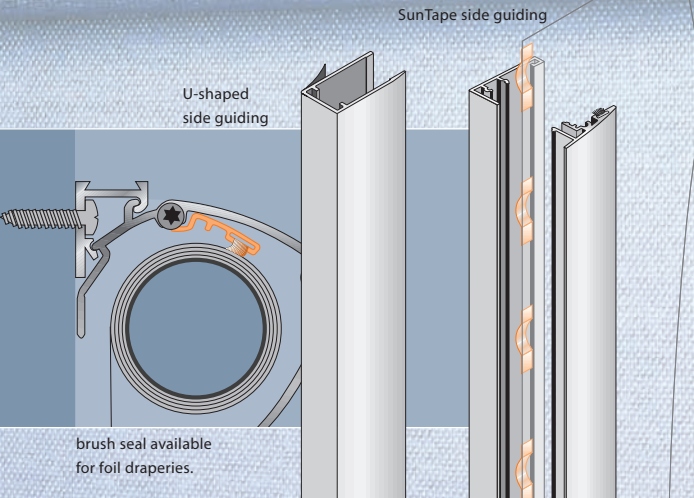

roller blind with head box, "shaft below" (WU), with SunTape side guiding, side pull drive

special shapes like triangle or trapezoidal shape.

Side guiding at its best

Take a look at the various types of side guidings and make your choice: for example **SunTape**, a sundrapé® invention with international patent, or the U-shaped side guiding which combines the advantages of the protection for your drapery and a reasonable technique. Make your choice – both kinds of side guidings are extremely minime in their dimensions of only 28 x 14 mm.
